Progress Report

Dear Sir,

In behalf of Mr. Jack Downs, Piasa Township Highway Commissioner, I wish to inform the commission of the progress on this project. During this quarter Piasa Township has placed 75 tons of stabilized base course on the approaches to the railroad crossing. It is our opinion that the placement of the leveling binder and seal coat work needs to be done after the railroad company has completed their crossing work just in case they retamp their ballast material which might change the elevation of the timbers at the crossing. The seal coat portion of work on this project cannot be completed until the temperature warms up next spring.

Sincerely,

Jim Hill
County Engineer

JH/kr

Cc: Jack Downs
Piasa Township

DOCKETED
